**PA BANKERS SERVICES CORPORATION
NAMES @RISK TECHNOLOGIES, INC. AS SELECT VENDOR**
@RISK Technologies, Inc. Provides Cyber Risk Management Solutions

Harrisburg – The PA Bankers Services Corporation (Services Corp.) is pleased to announce the addition of @RISK Technologies, Inc. into its Select Vendor Program.

“@RISK Technologies will enhance our cybersecurity offerings, helping member banks to create a more advanced cyber protection program,” said Duncan Campbell, president & CEO of the Pennsylvania Bankers Association (PA Bankers). “Their unique, machine-based learning pre-incident analytical technology offers a faster, more efficient platform to safeguard critical customer financial information and head off any incidents before a full breach in security can occur.”

Using artificial intelligence powered by IBM’s Watson to create a Network Consensus, @RISK performs pre-incident forensic analysis on real-time threats and leverages the technology to enhance incident forecasting, reduce costs and ensure business continuity.

“@RISK Technologies believes that true cyber situational awareness is achieved by measuring the cyber attack surface,” said Sean O’Brien, CEO of @RISK Technologies. “You can’t solve what you can’t measure. It’s better to detect sinister intentions early than to respond to compromised networks and conduct cyber forensics after the injury has occurred.”

@RISK’s solution allows financial institutions to avoid costly post-event forensics should a breach occur, and augments current IT staffing through significant automation capabilities. The platform also includes an automated version of the Federal Financial Institutions Examination Council’s (FFIEC) Cyber Assessment Tool (CAT), dramatically improving accuracy and reducing the time needed to complete FFIEC requirements, as well as a Balanced ScoreCard measurement tool for overall cybersecurity.

The platform’s automated digital forensic investigation provides a window into what’s happening on the dark web, analysis of potential avenues of attack and a perimeter threat application that collects and reports three years of threat information from across the globe. This includes deterrence; use of advanced analytics to delay, impede or halt the initial threat; deploying barriers to break down the will of the threat; system stabilization; and maintenance.

@RISK’s team includes former military leaders with extensive experience supporting the U.S. Department of Defense and U.S. intelligence agencies, partnered with technological experts and former IBM employees who understand and have been at the forefront of cybersecurity advancements for decades.

FOR IMMEDIATE RELEASE

“The Services Corp. is always looking to add valuable solutions to help our members address today's most difficult banking challenges,” Campbell said. “@RISK’s no-cost operational assessment tool and Balanced ScoreCard offered through their platform create a common-sense fusion of bank operations with compliance and risk management.”

@RISK Technologies gained entry into the Services Corp.’s Select Vendor program through a rigorous selection process, requiring validation and approval from a 13-member board representing deposit groups across the PA Bankers membership. The board undertakes due diligence and proper vetting of all potential new Select Vendors via a detailed application process, independent financial review of the company and extensive reference checks with current banking customers, among other criteria.
